Professional Summary

Incoming Bachelor of Science in Information Technology graduate specializing in Mobile and Web Application Development with hands-on experience in software development and automation. Strong foundation in software engineering principles, problem-solving, and collaborative development, with experience in academic and internship environments. Passionate about building efficient, scalable, and user-focused software solutions. Committed to delivering high-quality, reliable software and continuously improving through real-world development experience.

Education

National University – Baliwag | Bachelor of Science in Information Technology, Specialization in Mobile and Web Applications | 2022 – 2026

Experience

IT - Software Engineer Intern | BMG Outsourcing — 2/F Clark Center 9, Berthaphil, Pinatubo Ext., Jose Abad Santos Ave Zone, Clark Freeport, Angeles City, Pampanga,

Internship | December 2025 – May 2026

Bootable Drive Automation Tool | C++ | Windows Deployment

- Developed a tool that automates system setup for new employees, including operating system installation, user account creation, and software installation.
- Improved onboarding efficiency by reducing manual setup time and ensuring consistent computer configurations for employees.

Finance Management System | Python | Excel Automation

- Developed a system for managing BIR-compliant financial records, including creating, updating, and organizing transaction data for bookkeeping and reporting.
- Generated automated Excel reports that reduced manual encoding workload for the finance team and improved accuracy and efficiency in financial record handling.

Accountability Report Generator | Python | CSV Processing | Word Automation

- Built a system that processes employee asset inventory records and manages accountability data for company-issued assets assigned to employees for compliance and monitoring purposes.
- Automatically generates formatted Word documents, replacing manual report preparation and improving efficiency, accuracy, and consistency in compliance documentation.

Projects

KamayTeks — FSL Mobile App for Translation & Learning | React Native | Firebase | Node.js

- Developed a cross-platform mobile app that translates Filipino Sign Language (FSL) into text and voice in real time, enabling Deaf and hearing users to communicate more easily.
- Created interactive learning modules with gamified exercises and progress tracking to support both learners and instructors in studying FSL.
- Promoted the use of FSL by making it accessible on mobile devices, encouraging everyday communication practice and fostering inclusivity between Deaf and hearing communities.

MindConnect — Mobile Mental Health Support Platform | Flutter | Firebase | Node.js

- Built a cross-platform mobile app that allows users to chat with an AI mental health assistant, complete guided self-assessments, and access personalized coping strategies.
- Developed community forums where users can connect in real time, share experiences, and provide peer support in a safe and supportive environment.
- Progress-tracking features that help individuals monitor their mental well-being over time and stay engaged in their personal growth.

Technical Skills

Programming Languages: Python, Java, Kotlin, C++, C#, PHP, Dart, JavaScript, TypeScript

Frameworks & Libraries: React, Next.js, Node.js, Flutter, Bootstrap, Tailwind CSS, Laravel, Express.js

Databases: MySQL, SQL, MongoDB, Firebase

Developer Tools: Git, GitHub, Visual Studio Code, Android Studio, IntelliJ IDEA, Docker, Postman, Figma, Adobe Photoshop, Notion

Automation & Workflow: Power Automate, n8n

Other Skills: Troubleshooting, Problem Solving, Technical Documentation, Team Collaboration, Attention to Detail, Time Management, Communication, Debate Skills, Public Speaking.

Certifications

IRCITE 2025 – Paper presentation recognized with a Certificate of Appreciation – April 2025

Microsoft Office Specialist (MOS) – Certified in Microsoft Office applications

Fundamentals of HTML – Demonstrates strong understanding of HTML fundamentals and web page structure.

FreeCodeCamp – Responsive Web Design, JavaScript Algorithm and Data Structures.
